PRESS RELEASE

Dell Children's Medical Center First in Central Texas with State-of-the-Art MRI Technology *Burt-Watts Industries installs new MRI suite for children's medical center*

AUSTIN, TX December 10, 2008— Burt-Watts Industries, Inc., a leading Austin-based commercial general contracting firm, was selected to provide general contracting and construction management services for the expansion of a new intra-operative MRI suite at Dell Children's Medical Center of Central Texas. The IMRISneuro is a fully integrated operating room that includes a one-of-a-kind movable MRI machine; which will allow surgeons to safely image patients in the operating room during brain surgery.

"The convergence of surgery and imaging are resulting in innovative spaces," said Shane Watts, founder and vice-president, Burt-Watts Industries. "This project has been a collaborative, orchestrated effort between our company and Seton to ensure the environment meets key objectives and the operations of the hospital are not disrupted during the construction process."

Opening next summer, Dell Children's Medical Center's 6,000-square-foot suite is one of fewer than 20 medical facilities in the world to have the IMRISneuro. The suite, to be located 20 feet below ground-level, will have copper-shielding and a state-of-the-art MRI machine upon completion. A room will be also specifically designed to house the IMRISneuro when not in use.

"There have been a lot of "firsts" with this project and the technology is a distinct advantage for our patients and surgeons," said Bob Bonar, president and CEO, Dell Children's Medical Center. "In few other places is there an operating room facility that merges the capabilities of a high-field magnet with a state-of-the-art neuro-operating room. Burt-Watts' expertise has been an important component in bringing this advanced and critical technology to our facility."

The new MRI suite is following Leadership in Energy and Environmental Design (LEED) Platinum standards. Dell Children's is on track to be the first hospital in the world to receive the designation.

Burt-Watts Industries specializes in tenant finish-out, ground-up developments, design-build services, retail and health care projects. The company has completed projects with leading architects, developers and companies throughout the Greater Austin area. Clients of the firm include Advanced Micro Devices, Seton Family of Hospitals and Goodwill Industries of Central Texas.

Founded in 2002, Burt-Watts was ranked by the *Austin Business Journal* as one of the region's fastest growing companies for 2007 and 2008.
