Burt-Watts Creates New Offices for Leading Entrepreneur School

Austin, January 22, 2009 - Burt-Watts Industries, Inc., a leading Austin-based commercial general contracting firm, was selected to provide general contracting and construction management services for Acton MBA's new 6,500-square-foot downtown Austin administrative and business office at 816 Congress.

Slated for completion this month, the new downtown office will house approximately 25 employees managing admissions, business support processes and other key functions for the leading entrepreneur-focused MBA school. In August, Acton opened its first permanent campus at 1404 East Riverside Dr.

"Our new address at 816 Congress puts us in the heart of downtown and supports the culture of our cutting-edge program. Burt-Watts has worked collaboratively on this project to implement the design and deliver the space according to our key objectives," said Elizabeth Richard, customer advocate, Acton MBA.

The Princeton Review ranks Acton as one of the top 10 MBA "Classroom Experiences" in the country and its teachers among the top five MBA faculties in the nation.

"We are excited to be working on this project for one of Austin's cutting edge institutions," said Tommy Burt, president, Burt-Watts. "Academic environments require meeting key deadlines. Solid project management and client collaboration is central to the success of such projects."

lauckgroup served as the architect and designer on the project.
