Concise Encyclopedia of Archaeology: from the Bronze Age - Georges Ville - 1971
Concise Encyclopedia of Archaeology: from the Bronze Age - Georges Ville - 1971

One of the glories of the Greco-Roman classics is the opportunity that they give us to consider a great culture in its entirety; but our ability to do that depends on our ability to work comfortably with very varied fields of scholarship. The Handbook for Classical Research offers guidance to students needing to learn more about the different fields and subfields of classical research, and its methods and resources. The book is divided into 7 parts: The Basics, Language, The Traditional Fields, The Physical Remains, The Written Word, The Classics and Related Disciplines, The Classics since Antiquity. Topics covered range from history and literature, lexicography and linguistics, epigraphy and palaeography, to archaeology and numismatics, and the study and reception of the classics. Guidance is given not only to read, for example, an archaeological or papyrological report, but also on how to find such sources when they are relevant to research. Concentrating on "how-to" topics, the Handbook for Classical Research is a much needed resource for both teachers and students.

This book is an introduction to library research in anthropology written primarily for the undergraduate student about to begin a research project. It contains a summary description of the type of resource being discussed and its potential use in a research project.

A Distant Prospect of Wessex: Archaeology and the Past in the Life and Works of Thomas Hardy. - Martin J. P. Davies - 2011-08-15
Martin Davies examines Thomas Hardy's involvement with the past and the role it plays in his life and literary work. Hardy's life encompasses the transformation of archaeology out of mere antiquarianism into a fully scientific discipline. He observed this process at first hand, and its impact on his aesthetic and philosophical scheme was profound.

Block Scheduling and Its Impact on the School Library Media Center - Marie Shaw - 1999-02-28
Across the country educators are facing the challenge of restructuring the secondary school to meet the needs of students in the twenty-first century. Block scheduling provides sustained time and fosters an environment for active and experiential learning, a key to student success in life. The author, who has spearheaded the adoption of block scheduling in her school's library media center, has prepared a complete guide for library media specialists contemplating or moving to block scheduling. In preparing this guide she has incorporated the experiences of twelve secondary school libraries across the country that have also moved to block scheduling. Step by step, this guide walks the library media specialist through planning, networking, curriculum and instruction, professional development, technology, and assessment. Practical suggestions, forms, lesson plans, and case studies of other media centers that have successfully adopted block scheduling will help the library media specialist to make the transition to the block. Block scheduling places a high demand on staff, materials, and information technologies. Sharing expertise and networking of people and resources is essential to successful adoption of block scheduling. She takes the reader through the planning and transitional phases of a high school adopting block scheduling and addresses concerns about instructional change, ongoing curriculum, and the role of the library media specialist as a teacher of information technology. She provides ideas on where to find professional development and how to network with other library media specialists with expertise in the block and offers practical suggestions on resource sharing, study hall, flexible scheduling, budget, collection development, substitute teachers, and assessment techniques.

Angkor Wat - A Transcultural History of Heritage - Michael Falser - 2019-12-16
This book unravels the formation of the modern concept of cultural heritage by charting its colonial, postcolonial-nationalist and global trajectories. By bringing to light many unresearched dimensions of the twelfth-century Cambodian temple of Angkor Wat during its modern history, the study argues for a conceptual, connected history that unfolded within the transcultural interstices of European and Asian projects. With more than 1,400 black-and-white and colour illustrations of historic photographs, architectural plans and samples of public media, the monograph discusses the multiple lives of Angkor Wat over a 150-year-long period from the 1860s to the 2010s. Volume 1 (Angkor in France) reconceptualises the Orientalist, French-colonial ‘discovery’ of the temple in the nineteenth century and brings to light the manifold strategies at play in its physical representations as plaster cast substitutes in museums and as hybrid pavilions in universal and colonial exhibitions in Marseille and Paris from 1867 to 1937. Volume 2 (Angkor in Cambodia) covers, for the first time in this depth, the various on-site restoration efforts as the ‘Archaeological Park of Angkor’ from 1967 until 1970, and the temple’s gradual canonisation as a symbol of national identity during Cambodia’s troublesome decolonisation (1953-89), from independence to Khmer Rouge terror and Vietnamese occupation, and, finally, as a global icon of UNESCO World Heritage since 1992 until today.

Perilous Planet Earth - Trevor Palmer - 2003-06-12
A readable account of the history of natural disasters throughout history.

The Scientific Study of Mummies - Arthur C. Aufderheide - 2003

With more than 1,400 black-and-white and colour illustrations of historic photographs, architectural plans and samples of public media, the monograph discusses the multiple lives of Angkor Wat over a 150-year-long period from the 1860s to the 2010s. Volume 1 (Angkor in France) recontextualises the Orientalist, French-colonial ‘discovery’ of the temple in the nineteenth century and brings to light the manifold strategies at play in its physical representations as plaster cast substitutes in museums and as hybrid pavilions in universal and colonial exhibitions in Marseille and Paris from 1867 to 1937. Volume 2 (Angkor in Cambodia) covers, for the first time in this depth, the various on-site restoration efforts inside the ‘Archaeological Park of Angkor’ from 1907 until 1970, and the temple’s gradual canonisation as a symbol of national identity during Cambodia’s troublesome decolonisation (1953-89), from independence to Khmer Rouge terror and Vietnamese occupation, and, finally, as a global icon of UNESCO World Heritage since 1992 until today.

Ancient and Medieval Medicine in Malta [before 1600 AD] - Charles Savona-Ventura - Bookseller - 1972

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately pagged and not included in the consecutive numbering of the regular series.

Mystery of the White Lions - Linda Tucker - 2010-06-01

This is Linda Tucker's firsthand account of her journey into the mysteries of the most sacred animal on the African continent: the legendary White Lion. This book reveals the knowledge and ceremonies of Old Africa and the overwhelming love that has driven her every action to save these magnificent beasts, against formidable odds... After being rescued from a life-threatening encounter with lions in the Timbavati game region by a medicine woman known as the "Lion Queen," Linda embarked on a journey into the mysteries of the White Lion. It is a story spanning the knowledge and ceremonies of Old Africa, in which humans and lions are able to cross the species barrier—in accordance with the most guarded secrets of Ancient Egypt and humankind’s greatest riddle, the sphinx. Scientists in our day have established that humankind’s most significant evolutionary leap occurred as a result of our ancestors’ interaction with great cats. The White Lion is a genetic rarity of Panthera leo, and occurred in just one region on earth: Timbavati. Today White Lions form the center of the notorious ‘canned’ trophy hunting industry—hand-reared captive lions, shot in enclosures for gross sums of money. By contrast, shamans believe that killing a ‘lion sun god’ is the ultimate sacrilege. How the human species treats such precious symbols of God in nature may determine how nature treats the human species. Whether we view them as prophetic "Lions of God" or simply as rare genetic mutations, the story of the White Lions is a true legend unfolding in our own extraordinary times.

History of Psychiatry and Medical Psychology - Edwin R. Wallace - 2010-04-13

This book chronicles the conceptual and methodological facets of psychiatry and medical psychology throughout history. There are no recent books covering so wide a time span. Many of the facets covered are pertinent to issues in general medicine, psychiatry, psychoanalysis, and the social sciences today. The divergent emphases and interpretations among some of the contributors point to the necessity for further exploration and analysis.

Biblical Archaeology - Henry O. Thompson - 1987

Architecture in Motion - Robert Kronenburg - 2013-08-15
the most peculiar and lethal wildlife to be found on the planet. The result is a deliciously funny, fact-filled, and adventurous performance by a writer who combines humor, wonder, and unflagging curiosity. Despite the fact that Australia harbors more things that can kill you in extremely nasty ways than anywhere else, including sharks, crocodiles, snakes, even riptides and deserts, Bill Bryson adores the place, and he takes his readers on a rollicking ride far beyond that beaten tourist path. Wherever he goes he finds Australians who are cheerful, extroverted, and unfailingly obliging, and these beaming products of land with clean, safe cities, cold beer, and constant sunshine fill the pages of this wonderful book. Australia is an immense and fortunate land, and it has found in Bill Bryson its perfect guide.

In a Sunburned Country - Bill Bryson - 2000-09-01
Every time Bill Bryson walks out the door, memorable travel literature threatens to break out. This time in Australia. His previous excursion along the Appalachian Trail resulted in the sublime national bestseller A Walk in the Woods. In A Sunburned Country is his report on what he found in an entirely different place: Australia, the country that doubles as a continent, and a place with the friendliest inhabitants, the hottest, driest weather, and the most peculiar and lethal wildlife to be found on the planet. Proceedings of the 22d-33d annual conference of the Library Association in v. 1-12; proceedings of the 34th-44th,

country that doubles as a continent, and a place with the friendliest inhabitants, the hottest, driest weather, and use it, perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society, while at the same time dealing with issues of practicality, economy and sustainability. Architecture in Motion examines the development of portable, transportable, demountable and temporary architecture from prehistory to the present day. From familiar vernacular models such as the tent, mobile home and houseboat, to ambitious developments in military and construction engineering, all aspects of portable building are considered. Building on his earlier works Portable Architecture and Houses in Motion, Robert Kronenburg compares traditional forms of building, current commercial products and the work of innovative designers, and examines key contemporary portable buildings to reveal surprising, exciting and imaginative examples. He explores the philosophical and technological issues raised by these experimental and futuristic prototypes. By understanding the nature of transitory architecture, a new ecologically aware design strategy can be developed to prioritise buildings that 'tread lightly on the earth' and still convey the sense of identity and community necessary for an established responsible society. This book provides a unique insight into this pivotal field of design.

Architecture in Motion - Robert Kronenburg - 2013-08-15
The idea that architecture can be portable is one that grabs the imagination of both designers and the people who use it, perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society, while at the same time dealing with issues of practicality, economy and sustainability. Architecture in Motion examines the development of portable, transportable, demountable and temporary architecture from prehistory to the present day. From familiar vernacular models such as the tent, mobile home and houseboat, to ambitious developments in military and construction engineering, all aspects of portable building are considered. This book provides a unique insight into this pivotal field of design.

Man and Wildfowl - Janet Kear - 2010-11-30
The involvement of humans with ducks, geese and swans has probably been closer than with any other group of birds, today or for several millennia past. This involvement, in its many aspects, is the theme of this compelling and readable account by an Assistant Director of the Wildfowl and Wetlands Trust. Dr Kear ranges widely, from a summary of the taxonomy and natural history of wildfowl, through a history of domestication worldwide, to wildfowling, decoys, conservation and captive breeding, conflicts with agriculture, and wildfowl in legend and literature. Throughout, the text abounds with little-known facts and insights to intrigue the general reader and expert alike - a reflection of the author's wide reading and affection for her subject. Jacket illustrations by Joe Blossom
