My Name is Brain Brian

American Read. Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

**Ava Tree and the Wishes Three** - Jeanne Betancourt - 2009-03-31

The morning of Ava Tree's eighth birthday begins the same as always . . . only different. Today, Ava makes wishes and they come true. It's A for Amazing! First, she wishes that her pet rabbit, Tibbar, will use the toilet instead of his messy, annoying litter box . . . and he does. Then she wishes that her best friend's very proper mother will not ruin her very improper backwards birthday party by making it forward, upside up right, down side down, and right side out . . . and she doesn't. Can Ava wish for anything she wants on her birthday—and every day after that—and have it come true? What if her biggest wish is to undo the saddest thing in her life so far (and possibly forever)? Can that wish come true, too? It couldn't hurt to try.

**Until the End of Time** - Brian Greene - 2021-04-06

"From the world-renowned physicist, co-founder of the World Science Festival, and best-selling author of The Elegant Universe comes this utterly captivating exploration of deep time and humanity's search for purpose. Brian Greene takes readers on a breathtaking journey from the big bang to the end of time and invites us to ponder meaning in the face of this unimaginable expanse. He shows us how, from its original orderly state the universe has been moving inexorably toward chaos, and, still, remarkable structures have continually formed: the planets, stars, and galaxies that provide islands in a sea of disorder; biochemical mechanisms, including mutation and selection, animate life; neurons, information, and thought developed into complex consciousness which in turn gave rise to cultures and their timeless myths and creativity. And he describes, as well, how, in the deep reaches of the future, the nature of the universe will threaten the existence of matter itself. Through a series of nested

Guts: Gary Paulsen - 2007-12-18

Guess what – Gary Paulsen was being kind to Brian. In Guts, Gary tells the real stories behind the Brian books, the stories of the adventures that inspired him to write Brian Robeson’s story: working as an emergency volunteer; the death that inspired the pilot’s death in Hatchet; plane crashes he has seen and near-misses of his own. He describes how he made his own bows and arrows, and takes readers on his first hunting trips, showing the wonder and solace of nature along with his hilarious mishaps and mistakes. He shares special memories, such as the night he attracted every mosquito in the county, or how he met the moose with a sense of humor, and the moose who made it personal. There’s a handy chapter on “Eating Eyeballs and Guts or Starving: The Fine Art of Wilderness Nutrition.” Recipes included. Readers may wonder how Gary Paulsen survived to write all of his books -- well, it took guts.

“Traditionally, scientists have emphasized what they call the first and second natures of personality—genes and culture, respectively. But today the field of personality science has moved well beyond the nature vs. nurture debate. In Who Are You, Really? Dr. Brian Little presents a distinctive view of how personality shapes our lives—and why this matters. Little makes the case for a third nature to the human condition—the pursuit of personal projects, idealistic dreams, and creative ventures that shape both people’s lives and their personalities. Little uncovers what personality science has been discovering about the role of personal projects, revealing how this new concept can help people better understand themselves and shape their lives”—provided by publisher.

Brian the Maker - Gregor Cole - 2014-12-16

Brian tried to remember how all this started as he drove into the torrential night; it almost hurt his head trying to recall the events leading to this moment in time. Maybe it had started when he was at university. He had a girlfriend in his final year that had gotten him into some weird stuff sexually then she left him for a guy with a bigger cock. The other guy was some gay looking chump with muscles and a tattoo; the pair had died in a car accident and Brian took a dump on their graves after each of their funerals. Fuck the both of them. But after she had left him he needed to fill the void of the newfound enjoyment of sickening sexual practices. Brain had purchased one of those ‘real life’ sex dolls online from a Japanese company; the company had some kooky name thing look real, you could bend it into any position and it came armed with enormous tits, willing mouth and a supposedly real feel pussy and anus. The packaging said to ‘just add lubricant’ but there was a problem. There was something missing; the smells, the tastes and the feel of real skin. You can’t emulate that. So Brian set out to attempt to build a real life sex toy made from real life people.

Hoax - Brian Stelter - 2020-08-25

The explosive New York Times bestseller that reveals the collusion between Fox News and Donald Trump—with explosive new reporting covering the election and the January 6 riot. As the nation recovers from the Trump presidency, many questions remain: Why was the COVID-19 pandemic so grossly mishandled? How did we get so politically polarized? What caused white nationalist groups to come out of the shadows, and are they here to stay? The answers lie in the twisted story of the relationship between Donald Trump and Fox News. Through firsthand accounts from over 250 current and former Fox insiders, CNN anchor and chief media correspondent Brian Stelter unlocks the inner workings of Rupert Murdoch’s multibillion-dollar media empire. The confessions are shocking: “We don’t really believe all this stuff,” a producer says. “We just tell other people to believe it.” Stelter completes the story of the Trump years and looks toward the future of the network that made him. Hoax is a book for anyone who reads the news and wonders how we got here, and what happens next.

Annihilation - Jeff VanderMeer - 2014-02-04
The Southern Reach Trilogy begins with this Nebula Award-winning novel that "reads as if Verne or Wellsian adventurers exploring a mysterious island had warped through into a Kafkaesque nightmare world" (Kim Stanley Robinson). Area X has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; the second expedition ended in mass suicide; the third expedition in a hail of gunfire as its members turned on one another. The members of the eleventh expedition returned as shadows of their former selves, and within weeks, all had died of cancer. In Annihilation, the first volume of Jeff VanderMeer's Southern Reach trilogy, we join the twelfth expedition. The group is made up of four women: an anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain, record all observations of their surroundings and of one another, and, above all, avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them and the secrets the expedition members are keeping from one another that change everything.

Punch Me Up to the Gods introduces a powerful new talent in Brian Broome, whose early years growing up in Ohio as a dark-skinned Black boy harboring crushes on other boys propel forward this gorgeous, aching, and unforgettable debut. Brian’s recounting of his experiences—in all their cringe-worthy, hilarious, and heartbreaking glory—reveal a perpetual outsider awkwardly squirming to find his way in. Indiscriminate sex and escalating drug use help to soothe his hurt, young psyche, usually to uproarious and devastating effect. A no-nonsense mother and broken father play crucial roles in our misfit’s origin story. But it is Brian’s voice in the retelling that shows the true depth of vulnerability for young Black boys that is often quietly near to bursting at the seams. Cleverly framed around Gwendolyn Brooks’s poem “We Real Cool,” the iconic and loving ode to Black boyhood, Punch Me Up to the Gods is at once playful, poignant, and wholly original. Broome’s writing brims with swagger and sensitivity, bringing an exquisite and fresh voice to ongoing cultural conversations about Blackness in America.

Captain Paul - Alexandre Dumas - 2021-07-05

Chained up in the hold of a French warship, Lusignan’s only hope of escape rests with his captor - Captain Paul. A man with a mysterious past, Captain Paul is transporting Lusignan to exile in the West Indies. Little does he know that his mission is a sham. His prisoner is an innocent man, framed because he fell in love with a Count’s daughter. Once the truth is revealed, Paul and Lusignan return to France, determined to seek justice. Inspired by the real life of American Revolutionary War hero John Paul Jones, “Captain Paul” is a rollicking melodrama, packed with action and romance. A fine precursor to Dumas’ later classics, this is especially recommended for fans of naval adventures, like C.S. Forester’s “Hornblower” series. Alexandre Dumas (1802 - 1870) was a hugely popular 19th Century French writer. Born of mixed French and Haitian heritage, Dumas first rose to prominence in Paris as a playwright, but later gained international fame with his historical fiction. Often co-authored with other writers, these stories wove together swashbuckling adventure, romance, and real events from France’s past. Among the best known are “The Three Musketeers”, and its sequels “Twenty Years After”, and “Le Vicomte de Bragelonne: Ten Years Later”. Set across four decades, this trilogy follows the rise of the dashing D’Artagnan—from hot-headed soldier to trusted captain under Louis XIV. Dumas’ other novels include “The Count of Monte Cristo” and “The Black Tulip”. His works have been adapted into more than 200 movies, including The Man in the Iron Mask starring Leonardo DiCaprio.
